

Tesselate becomes official distributor of Finastra's Fusion Invest software for the Moroccan asset management market

London, United Kingdom - Casablanca, Morocco – September 28, 2021 -

Tesselate Africa, a subsidiary of Tesselate Group, and Finastra, the largest pure-play software vendor that serves the entire financial services industry, today announced their partnership. Tesselate Africa is now certified as a distributor of Finastra's Fusion Invest solution, bringing a comprehensive front-to-back experience for asset managers to Morocco.

"With Finastra's global presence and proven technology, combined with Tesselate's local expertise, this move enables asset managers to access our agile, open and collaborative solution to streamline operations and boost transparency. Fusion Invest accelerates investment processes seamlessly with predictable deployment and world-class product support," said Younes Guemouri, Senior Vice President and Managing Director Fusion Invest, Finastra.

In today's uncertain market conditions, asset management firms must balance the needs of their local clients with the requirements of international regulations, increasing pressures on fees and the adoption of new technologies. In Morocco, the focus has been on portfolio management and risk management solutions that can both streamline a controlled investment process and ensure transparency of risk and performance analysis."Through this partnership and our Moroccan Centers of Excellence, Tesselate Africa aims to contribute to strengthening Morocco's position as a dynamic financial center in Africa and to consolidate its regional position as a financial hub," added Said Guida, Managing Partner of Tesselate Africa. "We are excited to work with Finastra to bring its proven technology to the region in support of our ambitions here."

With Fusion Invest, asset managers can implement new portfolio strategies seamlessly, at speed and with greater efficiency. Robust models monitor portfolio and balance risk management throughout the investment decision process.
